WLR67B-D4 11/15/24 Item # 13704

WxDxH 67" x 33.25" x 40.25"* Work Height 36"* *with 6" casters

19.97 ft3

Two-Section WLR67B-D4

Dimensions / Capacity Interior Storage Capacity (CF) (AHAM)

3 - 1 - 1	
Overall Width x Depth (including 1" bumper)	67" x 33.25"
Height (including 4" casters)	40.25"
Drawer Opening Width x Depth	22.5" x 9"
Depth with Drawer Fully Open (including 1" bumper)	57.5"
Crated Weight	452 lbs.
Crated Length x Width x Height	70.75" x 35.75" x 40"

Electrical / Refrigeration	Two-Section WLR67B-D4
Voltage	115/60/1
HACR Breaker	15.0 Amps
Electrical Connection (NEMA)	5-15P 🛈
Voltage Range	104-126
Ambient Temp. Range	45° to 100°F
Control Setpoint Range	28° to 45°F
Recommended Setpoint	36°F
Amperage	3
Energy Consumption (kWh/day) @NSF	1.33
Heat Rejection (BTU/Hr.) @NSF	381
Approx. Nominal Compres. BTU/HR (HP)	1354 (1/5HP)
Refrigerant / Charge Amount (oz)	R290 (2.2 oz)

Options

2" Casters (HS-5037, set of 4)
4" Casters (HS-5035, set of 4)
Overshelves (HS-5231, single)
Overshelves (HS-5230, double)

Drawer	divider	bar	(HS-4007,	Vertical)
Drawer	divider	bar	(HS-5691,	Horizontal
Drawer	linor /L	CE	740)	

Drawer divider bar (HS-5691, Horizont	al)
□ Drawer liner (HS-5740)	

ABOR PARTS Valid in United States, Canada, Puerto Rico and U.S. Territories. *Please visit oshizakiamerica.com/support/warranty, for more information.

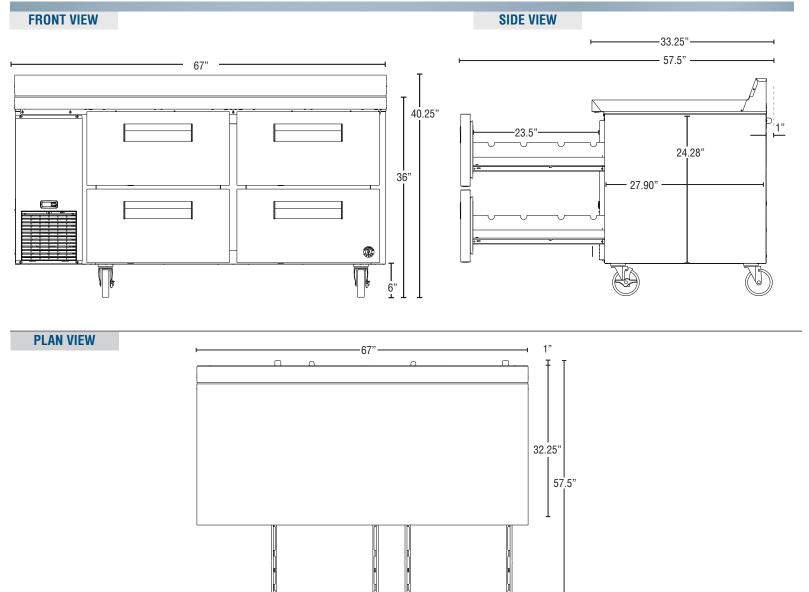

Features

- Front breathing air flow design allows for 1" of rear wall clearance
- Stainless steel exterior front, sides, and top with stainless steel interior sides, back, and floor
- Engineered to maintain NSF-7 temperatures in 100°F ambient
- · Environmentally friendly R290 hydrocarbon refrigerant
- Cabinet and drawers are insulated with 2" CFC free. foamed in place polyurethane
- Drawer slides are constructed of 14 gauge stainless steel with acetal rollers
- Drawer frames are formed of 14 gauge stainless steel and securely fastened in the cabinet
- Drawers will accommodate (2) 12 x 20" full size, 6" deep pans (pans by others)
- Drawer slides have a dynamic load capacity of 250 lbs.
- · Extruded aluminum flush mount drawer handle
- · Magnetic drawer gasket is easily removable for cleaning
- · Removable air filter for easy cleaning
- · Hot gas condensate removal
- Mullion heaters for reduced condensation
- · Digital temperature display
- · E-coated evaporator coil
- Standard with 6" casters (two with brakes)
- 10 ft. cord and plug

If GFCI is required, a GFCI breaker MUST be used in lieu of GFCI receptacle

Cabinet Construction

The exterior cabinet top, front, and sides, are constructed of high quality stainless steel. The exterior back and bottom are constructed of coated steel. The cabinet interior features stainless steel back, sides, and floor with a stainless steel top. Mounted on anodized aluminum pilasters the shelves are adjustable in ½" increments. Cabinet walls are insulated with 2" CFC free, foamed in place polyurethane. 6" polyolefin, stem casters (two with brakes) are standard.

Drawer Construction

Drawer fronts are constructed of high grade stainless steel with stainless steel interior and are insulated with 2" CFC free, foamed in place polyurethane. Each drawer accommodates (2) 12" x 20" x 6" deep pans (pans by others). Drawer frames are formed of 14 gauge stainless steel all welded construction and securely fastened in the cabinet. The drawer slides are constructed of heavy duty 14 gauge stainless steel and durable acetal rollers with stainless steel ball bearings to prevent metal to metal contact. The drawer slides have a dynamic load capacity of 250 lbs. and have been life tested (fully loaded) three hundred thousand cycles without showing significant wear. The flush mount handles are constructed of extruded aluminum. Snap-in magnetic drawer gaskets are durable and easily removed for cleaning.

Refrigeration System

The high efficiency refrigeration system is self-contained with an E-coated evaporator for extended life. Condensate removal is accomplished with an energy efficient non-electric evaporation system. A capillary tube controls the flow of environmentally friendly R290 refrigerant through the evaporator. Refrigeration system utilizes an off-cycle defrost to eliminate any ice on the evaporator coil. 115 volt units are equipped with a ten foot cord and plug (20.0 amps or less).
