Garnish Dispensers

CCD, CCD/T, CCD6-12

Product Information

The CCD model garnish dispensers consist of a stainless steel housing with clear, acrylic hinged cover that holds six pint-sized garnish cups. The garnish cups are removable for thorough cleaning. Garnish dispensers can be placed on the stationary portion of a sliding ice bin cover or on the bar top. The bottom of the garnish dispenser includes rubber pads to help prevent bar top scuffs.

The CCD/T model also includes a separate stainless steel tray that allows the garnish dispenser to clip to the rail of a pass-thru cocktail station tray shelf.

The CCD6-12 garnish dispenser fits into an IBA-12 or C-IBA-12 model ice bin or the bottle well of a CBA or C-CBA model combo ice bin to provide ice-chilled garnish storage. The CCD6-12 includes six pint-sized cups, two lift-off stainless steel covers, and a perforated liner insert to help lessen the amount of ice required to fill the ice bin.

CCD6-12
Installed in the bottle well of a combo ice bin
