

DEDICATED HOLDING BINS

Hold cooked products longer, better and safer while improving speed of service and reducing food waste! Prince Castle DHBs are an integral part of QSR work-in-process operations in which menu items are prepared to order on demand.

Specifically designed to hold individual menu item components, virtually any fried, grilled or baked food product can be held for an extended period of time and at an improved quality level compared to heat lamps, steam tables or other traditional point of use holding methods.

Prince Castle DHBs also include MenuTrak timer bars that offer operators the ability to “supervise” held products by assigning where menu item components are located and monitoring hold times. Prince Castle’s MenuTrak technology also provides improved speed of service and product consistency, with added built-in programmable features that alert operators when to cook new product and replace existing held product.

Dedicated Holding Bins

	Model No.	Description	Electrical Requirements	Watts	Plug Config.	Shipping Info
