Drop-In Hand Units

DI-I	DI-IS24, DI-IS24-LF, DI-IW24, DI-IW24-LF
-------------	--

Standard Features

- Manufactured with total welded construction to meet all NSF® standards
- Stainless steel top, interior liner, and sink bowl
- Unique hemmed edge for added strength and visual appeal
- 9-1/4" by 11-1/2" by 6" deep sink bowl
- Includes four 1/4-20 x 1-1/2" studs for mounting to countertop
- Includes 1-1/2" IPS drain fitting
- PVC plastic breaker strip around ice bin liner: creates 5/16" raised edge around liner, acts as thermal barrier to prevent heat transfer, and makes the cover slide easier
- Sliding stainless steel cover
- Eco friendly foamed-in-place insulation has zero impact on global warming or ozone depletion
- Galvanized steel exterior wrap
- 10-1/2" deep liner
- Heavy-duty faucet is standard (available less faucet by adding the suffix '-LF' to the model number)

Specifications

Drains

- Sink: 1-1/2" I.P.S. Threaded drain will fit Dearborn part #8033 slipnut and part #W-573P washer.
- Ice Bin: 1-1/2" tail piece

Faucet (not included with -LF models)

- DI-IS24: Deck mount on 4" centers, accepts 3/8" sink leads, hot and cold water connections required
- DI-IW24: Deck mount water filler, accepts 3/8" sink lead, cold water connection required

Sink Bowl Dimensions

- 9-1/4" by 11-1/2" by 6" deep

Cover

- Two piece sliding cover, stainless steel, included with all models

Ice Bin Liner Depth

- 10-1/2"

Ice Capacity

- 33 lbs

Cut-out Dimensions

- 17-1/2" by 22-1/2"

CUTOUT INFORMATION

INSTALLATION INSTRUCTIONS*

1. Remove angle brackets from drop-in unit.
2. Place unit into appropriate size cut-out for specific model number used.
3. Make initial drain connections, especially if access to drain is limited once the unit is in place.
4. Place unit into cut-out and finish plumbing the drain line.
5. Replace angle brackets, firmly tighten screws.
6. Place U-channels on top of bolts.
7. Tighten each bolt evenly along U-channels.
8. To establish proper sanitation operation and to comply with NSF & health codes, this unit must be sealed to the surface to which it is mounted using an NSF listed sealant. Place a bead of sealant along outer edges of the mounting flange and remove any excessive amount. Make sure there are no gaps in the sealant as the intent is to prevent liquid spillage from adjacent surfaces from passing under inaccessible portions of the equipment.

*Provided hardware allows for unit to be removable as necessary.
