## BLUE WILLOW

Originating in England, circa 1780, the Blue Willow design depicts the famous Chinese legend of a wealthy man whose daughter falls in love with his clerk. The young couple elopes and the father pursues them through his garden and onto the bridge where they transform into lovebirds and fly off beyond his reach. Central components to the story, the weeping willow, pagoda, bridge and lovebirds, are shown on every piece. Blue Willow is one of the most popular and collected dinnerware designs in the world today.
