

KB105-03

Designer KB105

Sleek design and color choices match modern restaurant design and décor. Curved design reduces potential liability by preventing chair from being turned upside down and used unsafely to balance an infant carrier. Constructed of seamless, solid HDPE plastic, which is more durable and sanitary than standard wood high chairs. Textured surface resists scuffing, chipping and scratching. Chair has a small footprint in the dining area and can be stacked up to four high for space savings. Table height chair allows a seated child to eat off a standard restaurant table.

Product Details:

- Modern design and appealing color palette integrates into a variety of restaurant décors
- Saves time as this chair is easy to clean and maintain
- Available assembled (KB105) or unassembled (KB105-KD)
- ASTM and EN Compliant
- TUV Certified

KB105-01

A CLOSER LOOK

Passive crotch restraint system and three point harness keeps child safely in place.

Curved design prevents chair from being used upside-down as an unsafe resting place for infant carriers.

Chairs can stack four high for easy storage and space savings.
