

Imersa Tower

SV330

This Smart Wi-Fi enabled immersion circulator is designed for the professional kitchen. The typical tower design with large easy-to-use display and 1800 watt heating element combined with a powerful pump lets the Imersa Tower efficiently heat up to 60 liters for cooking larger quantities. Attach it to just about any container or vessel and enjoy the flexibility to cook just about anywhere in the kitchen.

- Foldable design attaches over water bath vessel.
- Ability to reload previous temp and time after unexpected stops during cooking
- Smart wi-fi app enabled
- Only circulator to pass European CE IPX7 submersible safety reg.

- Pairs well with Vesta sous vide products, vacuum seal pouches and rolls
