A whole new oven experience

The Invoq PassThrough is the perfect double-doored kitchen appliance, where all the latest technologies have been made simple for you to use.

Stackit makes it possible to double your capacity without using more of your valuable floor space. When stacking two ovens, you gain maximum flexibility. You can easily work in different cooking modes without it requiring more working space. Stackit allows you to mix oven models, sizes, power supply and steaming technologies.

Both steam production and the automated cleaning system are controlled to utilize a minimum amount of energy and water without ever compromising quality results.

Intelligence at the tip of your finger...

ClimateControl

ClimateControl ensures best-in-class performance, controlling the air, heat and humidity levels. It optimises processes and even shortens cooking times. The result is consistent uniformity and predictably high quality.
