

# COLD STORAGE SWINGING DOORS

When environmental control is necessary, Curtron swing doors provide maximum sealing for any new or replacement application. Curtron doors are suitable for interior and exterior applications and are available with a wide variety of options, including panic hardware.

Curtron swing doors incorporate a tough and thermally neutral fiberglass reinforced pultrusion (FRP) framework, FRP casings, and non-CFC foamed-in-place polyurethane core. This innovative design produces a strong and durable door system that will provide years of worry-free service.
