Specifications

Merco's innovative holding cabinet with integrated touch-screen technology helps you to manage your kitchen operations effectively. Easy to program menu and holding options allow maximum flexibility.

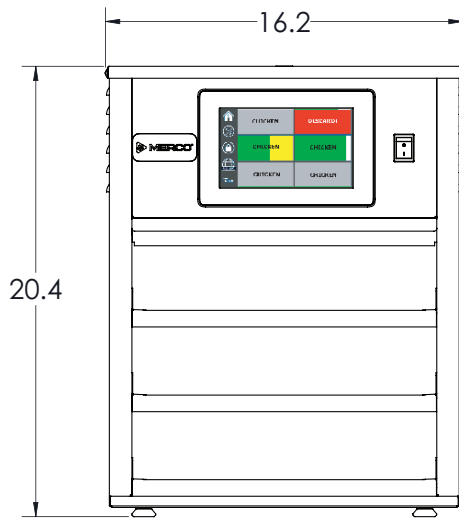

Merco's innovative design will hold up to 6 menu items in independently time-controlled slots.

Crew friendly intuitive touch screen controls make the unit easy to operate. Colorful displays can easily be viewed from across the kitchen, allowing users to quickly visualize food status.

The Merco Visual Holding Cabinet takes the worry out of maintaining food quality while holding a wide range of foods safely.

Merco's innovative technology gives you a holding cabinet with premier versatility and reliability. Call Merco for more information.
