

## Quick Click Central hose system

### Quick Click™ system

Now have your hose the length that YOU wish for; 20', 30' or up to 35'+! This crushproof hose has a gas-pump handle with a 3-way switch (can be used with low voltage), and is button-lock with triple swivel!

### Advantages:

- Exclusively use the effortless patented connection system. You no longer need to use the difficult "squeeze, push and pull" friction fit method.
- Leave your handgrip in the wand. Makes storage and transport much easier.
- Maintain greater vacuuming efficiency with the "Flow Through" design of the components matched with 1 3/8" (35 mm) ID hose.
- Remove all frustrations with the "triple swivel" design. The double swivel in the center of the hose combined with the swivel connection at the handgrip eliminates all frustrating twisting and tangling that are common with a conventional hose.
- Quick and easy access to any possible clogs. Maintenance of a conventional hose is very difficult in this situation.
- Shorten your hose to a much more convenient length of 20' which still offers a 40' cleaning radius, and allows greater efficiency and maneuverability when transporting around the house.
- Lengthen your hose to access those hard to reach areas.

QUICK CLICK SYSTEM, with 110V and 24V handles, direct connect kit, and velcro hose hanger

<b>HQCS10</b>	20' + 10', 1 3/8", light grey
