

# The new LANscape® SPH...What's in it for you?

**100%**

secure splice organizer,  
physically held in place  
by lances.

**100%**

adhesiveless splice organizer,  
zero sticky tape or glue required.

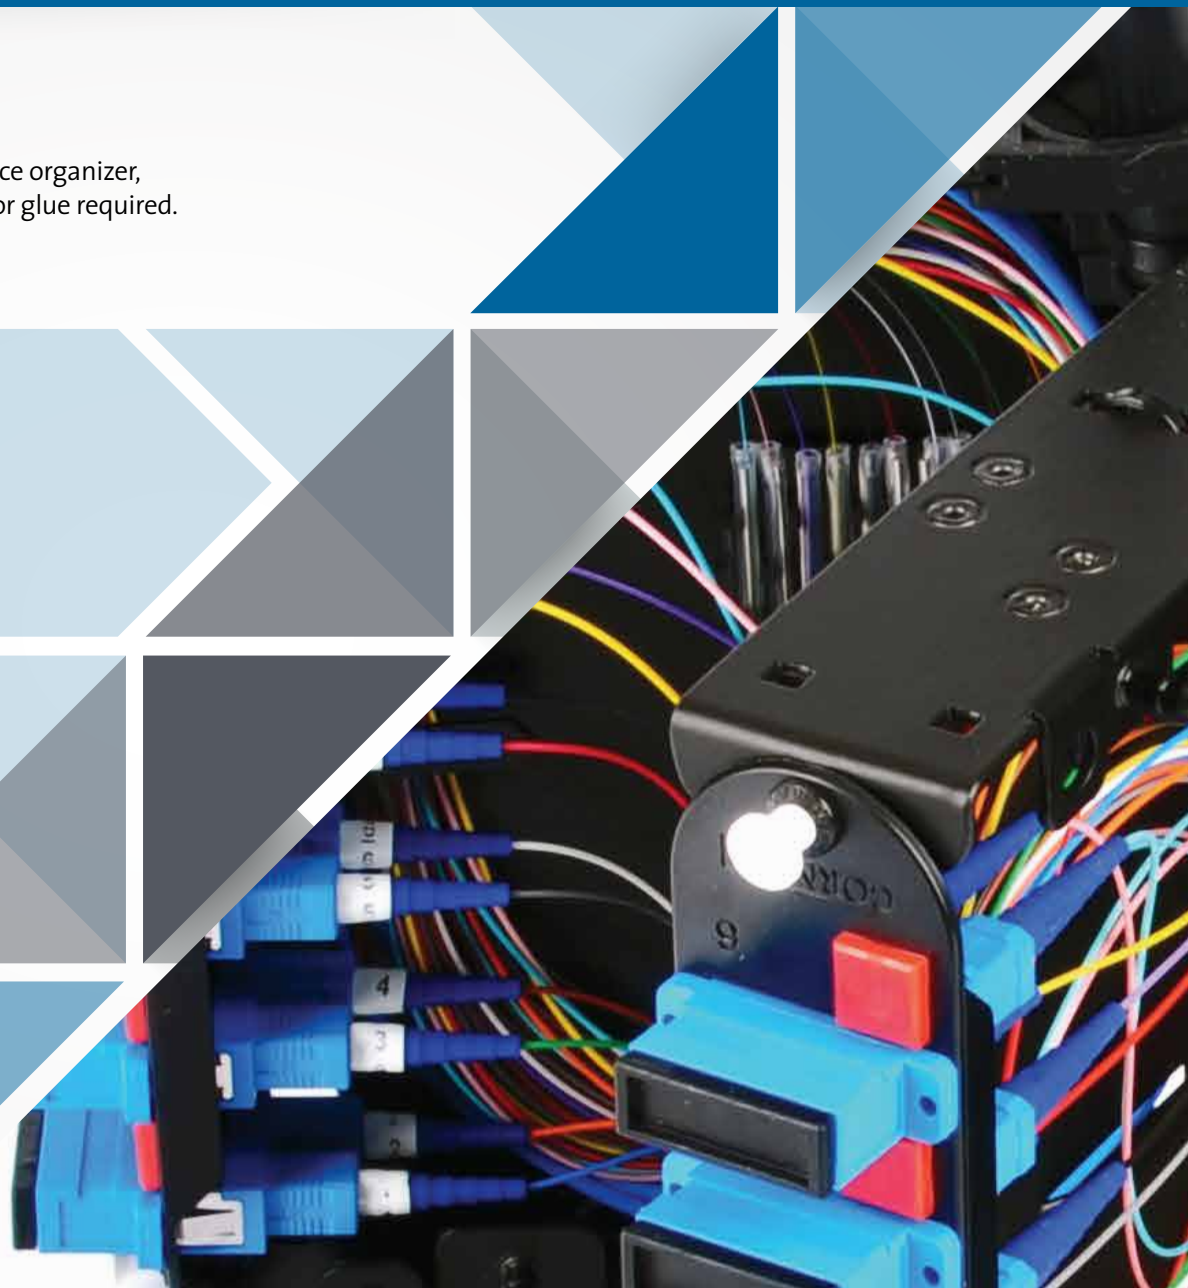

**100%**

subunit cable management  
(built in splice tray and  
routing guides)

**up to 3<sup>x</sup>**  
splicing capacity with  
3x space saving –  
expansion without  
compromise.

# SPH-01P features

1

Fiber pass-through:  
When stacked, bottom plate allows the transfer of fiber from one housing to another

2

Extract screws to remove top and bottom covers for stack ability.

Various mounting options: broadside, bookend, DIN rail, and ability to stack (opens like a book)

3

New hinges allow the ability to stack housing and optimize scalability

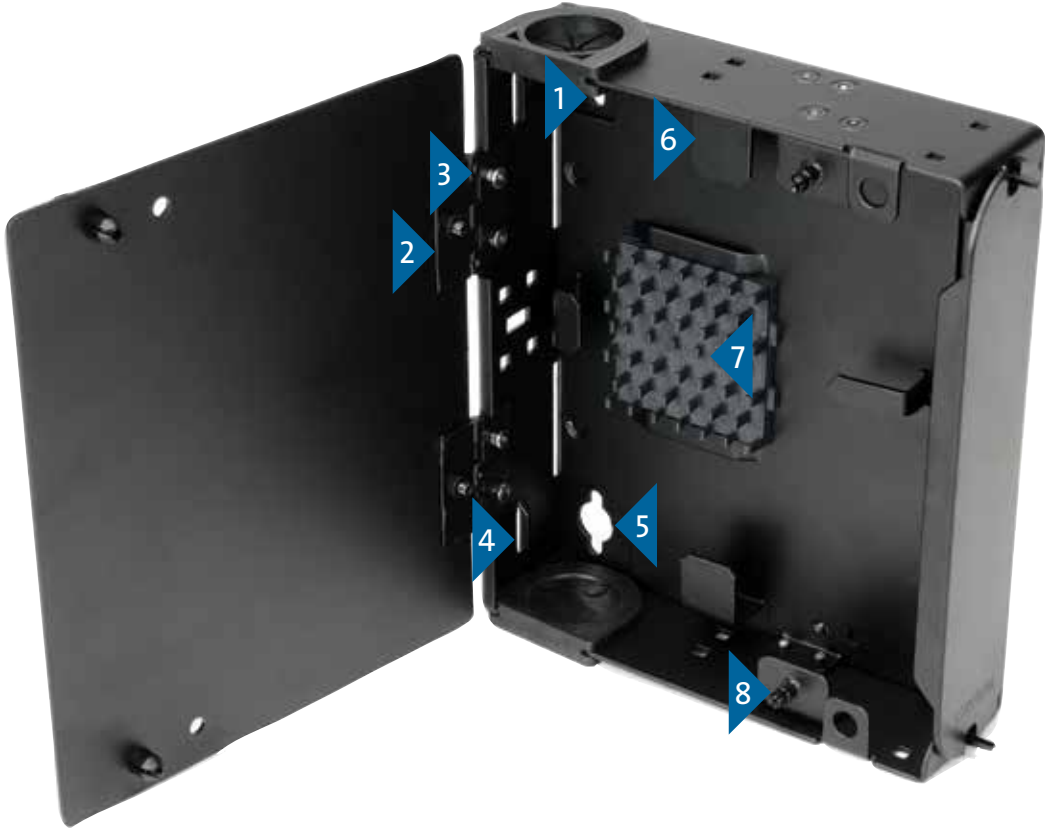

4

Lances for cable strain-relief

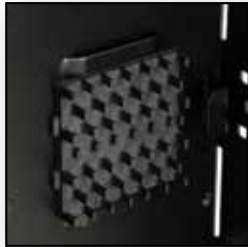

5

Dual teardrop mounting points

6

Built-in routing guide (for inner and outer routing)

7

Removable CCH splice organizer to manage splices (12-fiber capacity)

8

Metal tabs for alignment when stacking
