

HotSpot2 LED Emergency Lighting System

- Provides reliable emergency lighting capability in LED luminaires
- Low energy use during standby mode (CEC Title 20 Compliant)
- Programmable output current enables custom emergency runtimes
- Self-diagnostic capability reduces liability and maintenance costs

The HotSpot2 is a CEC-compliant LED emergency lighting system for use with LED modules driven by a constant current source. The battery charger automatically adjusts to the connected battery, and output current can be set by a wiring harness or Fulham's SmartSet programming software, allowing a wide range of lumen outputs and runtimes. Two driver form factors, plus a range of batteries, test switches, and extension cables, allow the HotSpot2 to provide LED emergency lighting in almost any situation.
