**EXPANDING RANGE OF HARSH & HAZARDOUS RECEPTACLE DEVICES**

Ranging from 20A blade style to 200AMP pin & sleeve devices, Killark provides numerous and field proven solutions for safely supplying power to fixed and portable equipment in hostile environments.

Interchangeability with other manufacturers configurations provides user flexibility for real world applications. The range also has exclusive convenience features like breech-lock caps with “3rd Hand” notch.

Devices include plugs, receptacles, panel receptacles, and connectors to extend the reach of portable equipment. For personnel safety, ground fault protected receptacles, both portable and fixed, are available.

### FEATURES-SPECIFICATIONS

## NEMA 4X VersaMATE®

### THE FIRST NEMA 4X RATED LINE OF METALLIC PLUGS & RECEPTACLES.

VersaMate® metallic pin & sleeve plugs & receptacles are designed for heavy duty industrial use. These devices supply power to both fixed and portable electrical equipment including pumps, generators, welders, vacuums, blowers and similar apparatus.

Suitable for indoor or outdoor use. Applications include the wet, cold, hosedown, hazardous or corrosive areas in such industrial applications as:

- Pulp & Paper Mills
- Electrical Power Plants
- Petrochemical Plants
- Wastewater Treatment
- Marine, Docks, Ports
- Construction Sites
- Breweries
- Refineries
- Chemical Plants
- Grain Facilities
- Textile Manufacturing
- Food Processing Facilities

<sup>①</sup> VersaMate® components are UL classified and intermateable with other UL 1686-C1 configured devices (when installed in accordance with instructions furnished with device). Assemblies containing components from other manufacturers would have the NEMA type rating of the lowest rated device. 150A models UL intermateable w/Appleton® Powertite® only.

<sup>②</sup> See product pages for specific ratings.

Arktite® is a registered trademark of Crouse-Hinds®.  
 Powertite® is a registered trademark of Appleton®.

### Standard Materials:

Copper-free aluminum construction with electrostatically applied epoxy/polyester finish. Contacts are brass with a patented beryllium copper spring tensioner. External screws are 316 stainless steel.

### Features:

The VersaMate product line includes 30, 60, 150<sup>①</sup>, 100 and 200 Amp plugs, receptacles and connectors with a full range of back boxes. Popular options include reverse service and polarization. The VersaMate line is **FULLY INTERCHANGEABLE**<sup>①</sup> with UL1686 configured and listed devices such as Crouse-Hinds® Arktite® or Appleton® Powertite®. Standard location receptacle bolt hole patterns match competitive back boxes so users can upgrade to VersaMate without changing back boxes in instances where changing the conduit system is difficult.

### Plugs:

Octagonal style (patented) for a firm and sure grip when connecting or disconnecting is featured on both plug and cable connector bodies. Insulators have high mechanical and dielectric strength and “Low Arc Tracking.” “Increased Safety” type box terminals with gripper ribs securely clamp around conductors. Funneled conductor entry chambers lead all properly stripped conductors into terminals **simultaneously**. NEMA 4X rating when inserted into VersaMate receptacle and locking ring is tightened. Includes suitability for Type P marine cable.

### Receptacles:

Exclusive Patented “Breech-Lock” cap serves as either flip lid or screw cover. Receptacle is NEMA 3R with lid snapped shut or NEMA 4X with lid turned shut or when VersaMate plug is inserted and locking ring tightened. Patented notch in cap arm holds cap open for easy plug insertion or maintenance. Patented pin design uses slotted spring clip which avoids excessive wear while providing continuous electrical pin to sleeve contact. VersaMate® receptacles use the same “Increased Safety” terminals and funnel design as VersaMate® plugs.

### Cable Clamping Assembly:

Plugs and cable connectors are supplied with an exclusive neoprene “Onion Skin” peel-away type grommet. The VersaMate® cable clamp system captures cable with **four grip points** using **only two** tightening screws. Clamp guide assembly provides a firm fit over a wide range of cable diameters. Non-removable set screws prevent clamp guide assembly from backing out. Clamps have smooth contoured shoulder design to prevent snags or damage when moving equipment.

### Back Boxes:

VersaMate back boxes come in a variety of mounting styles. Exclusive “blind” receptacle mounting holes prevent moisture from entering box via thread cavities. Boxes come with a green grounding screw.

# RECEPTACLES

VERSAMATE® SERIES

## FEATURES / COMPARISONS

- First NEMA 4X – Still the BEST!
- Exclusive interior gasketing
- Exclusive Terminal Designs
  - » No conductor machining
  - » Allen or Phillips types

- Exclusive Onion-Skin Gasket
  - » Perfect Cable Fit
- Exclusive 4-Point Cable Grip
  - » Uses only 2 Recessed Screws
- Exclusive Breech-Lock Cap
  - » Flip or Screw-On
  - » Notch to hold open

KILLARK BRAND	OTHER BRANDS
<b>TERMINALS</b>	
 <p>New Allen/slot terminal screws do not contact or machine conductor. Allows higher torque values typical in the oil industry.</p>	 <p>Conventional screw type terminals. Screws "machine" (grind or fray) conductor. Screws are not under tension and more easily loosen from heating and cooling cycles or from vibration. Screws can fall out (and be lost) during initial shipment – requires reassembly.</p>
 <p>VersaMate original Phillips/slot "Increased Safety" type terminals reduce connection fatigue. Screws do not contact or machine conductor and are under spring tension to reduce loosening and pullout due to vibration.</p>	
<b>CAP</b>	
 <p>"Breech-Lock" design serves as both flip lid or screw cover style. Special notch in lid arm holds cover open to ease plug insertion or maintenance. *Slip pencil or screwdriver into notch.</p>	 <p>Conventional caps: user must choose between flip lid's convenience or screw cover's better sealing capabilities. Broken chains can mean lost covers.</p>
<b>GASKET</b>	
 <p>Exclusive "Onion Skin" style gasket assures a tight seal around cable. Skin layers are removed from a single gasket to adjust for various cable diameters.</p>	 <p>Multiple gaskets require trial &amp; error sizing to be sure of best fit and seal.</p>

### REVERSE SERVICE: S39

Add suffix **S39** for factory Reverse Service of receptacles, plugs or connectors. Receptacles or connectors are assembled with plug interiors while plugs are assembled with receptacle interiors. For applications where the plug is energized (i.e. from a generator) to feed a non-energized receptacle. Prevents easy contact with energized exposed pins. This conversion can be performed in the field with a complementary plug and receptacle (30A to 150A devices shown on pages R5-R8). 200A Amp devices shown on page R11 are a factory-only option. Reverse service is not for hazardous locations.

Typical Application

### POLARIZED OPTION: S37

Add suffix **S37** for special polarity.

Can prevent connection between mismatched voltages or frequencies in areas where devices of the same amperage, poles and grounding style are used. Receptacle or connector interiors are rotated 22-1/2° to the right; plug is rotated opposite to match. This is a factory only option.

Standard

S37 Option

## EXCLUSIVE FEATURES & GROUNDING METHODS

**P** **Patented** Exclusive “Breech-Lock” cap serves as either flip lid or screw cover

- NEMA 3R Rating: When receptacle cap is snapped shut
- NEMA 4X Rating: When receptacle cap is turned shut or with VersaMate® plug inserted and ring tightened

**P** **Patented** Special notch is designed to hold cap open for easy field service or plug insertion with **two** free hands

• Funneled wiring chamber design for fast and accurate conductor insertion to speed assembly. All wires can be inserted at **one time**

• Exclusive neoprene “Onion Skin” peel-away type gasket for the ultimate in sealing a variety of cable sizes

• The VersaMate® Cable clamp system captures cable with four grip points using only two tightening screws. Provides secure grip without damaging the cable insulation

• **Unique VersaMate® Feature**  
The VersaMate Line is designed for the industrial customer based on engineering and user surveys

**P** **Denotes Patented Feature**

• Allen/Slot type box terminals provide secure clamping of conductors (200A Version is Patented)

• Exclusive O-ring seals

• **Custom** pin design using slotted spring clip to provide superior contact and reliability

• Exclusive O-ring seals

• Allen/Slot type box terminals provide secure clamping of conductors (200A Version is Patented)

**P** **Patented** Body style with octagonal shape for easy grip

• Smooth shoulder contour prevents snags & hang ups

### Grounding:

To minimize the danger of electrical shock when utilizing portable equipment, the National Electrical Code requires exposed metal parts be grounded if operated at more than 150 volts to ground. The VersaMate® plug & receptacle system is available in two grounding styles. Please note Style I and II devices cannot be intermated.

#### Style I

In a Style I plug, the cable's ground conductor is bonded to the plug housing by means of solderless connector. The receptacle is grounded by being part of a grounded conduit system. Upon insertion, detent springs in the receptacle housing contact and ground the plug housing before current carrying poles. All poles are current carrying.

3W3P Illustrated

#### Style II

In a Style II plug, the cable's ground conductor is bonded to the extra grounding pole and to the plug housing via a bonding jumper. The receptacle has a matching grounding pole connected to the system ground conductor which is further tied to the grounded conduit system via a bonding jumper. Upon insertion, detent springs in the receptacle housing contact and ground the plug housing; then the extra long ground pole connects before the current carrying poles engage. The Style II ground pole makes first and breaks last.

3W4P Illustrated

**Receptacle**

**Plug**

VersaMate® clamps provide a firm fit for one plug (or connector) over a wide range of cable diameters (competitors often need two – requiring additional sizing decisions).

**Connector**

① Components are intermateable & UL classified with Appleton® Powertite® or Crouse-Hinds® Arkrite® devices (when installed in accordance with instructions furnished with device. Assemblies containing components from other manufacturers would have the NEMA type rating of the lowest rated device.

② 200 Amp dead-end Back Boxes are available in sizes 1-1/2", 2" & 2-1/2" conduit sizes. Dead-end box shown is 2". For other available dead-end box sizes, change the BOLD "6" in either the dead-end assembly or box only number as follows: **5**=1-1/2", **6**=2", **7**=2-1/2". Feed through boxes are available in 2-1/2"; use "R" series adapters as required for smaller sizes (sold separately). Assembly catalog numbers are listed for ease of ordering or specification and devices are shipped as components.

③ Adapter-only can be used to attach receptacle at an angle to a standard sheet metal box.

④ Dimensions in ( ) are 3 pole devices; balance are 4 pole.

⑤ 200A 3W4P Reverse Service configured "W" Series and VersaMate® are not intermateable. However, the VersaMate VR20422-S39 receptacle ships with instructions to permanently convert for use with existing PW-6402X SU39 plugs. Factory only configured plugs to fit old RW64C-SU39 receptacles may be ordered as VP-PW64026 SU39.

NOTE: 200A VersaMate receptacle lids secure with wingnuts for N4X environments when not in use. VersaMate plugs secure with wingnuts and/or lock-ring collar. This exclusive dual method allows retention of competitive plugs that use either wingnuts or a lock-ring collar.

VSQ File No. LR14667

VWSQ File No. E216488

### FEATURES-SPECIFICATIONS

**Features**

- N4X with receptacle lid turned shut or with plug locking ring tightened
- Copper-free aluminum construction with electrostatically applied polyester/epoxy finish. Handle mechanism is chemical resistant Valox® (™ General Electric).
- Compact size and footprint
- Plug Interlock Mechanism for Dead-front construction. Switch cannot be turned “ON” without fully inserted plug. Plug cannot be removed with switch in “ON” position
- Plug held in place when switch is “Off” for convenience. Pull operated release mechanism. Plug and wiring do not have to be twisted or held to operate switch
- Factory Wired Receptacle; easy to wire line side of switch
- Easily visible “On-Off” indicator handle
- “Off” position is padlockable for maintenance safety
- Auxiliary Contact (late-make early-break) contact rated 10 Amp, 1/3 HP at 125/250 VAC. Can be used for operating pilot lights or starter coils (standard model only)

- Feed-through construction
- Horsepower Rated
- Internal switch horsepower rated as “motor disconnect”

### FEATURES-SPECIFICATIONS

#### Features

##### Receptacle:

- N4X with receptacle lid turned shut or with plug locking ring tightened
- Plug held in place when switch is "Off" for convenience. Pull button operated release mechanism. Plug does not have to be twisted to operate switch
- Dead-front construction when receptacle is off. Switch cannot be turned "ON" without fully inserted plug. Plug cannot be removed with switch in "ON" position
- Wire Connections do not bend when opening and closing door – minimizes loosening during installation or maintenance procedures
- For ground fault option, contact factory

VersaMate VBQ Receptacles use VersaMate Style II plugs found on 30, 60 and 100 amp pages and are compatible with appropriately configured Crouse-Hinds® Arkrite® or Appleton® Powertite® plugs (when installed in accordance with instructions furnished with device). Arkrite® is a registered trademark of Crouse-Hinds®. Powertite® is a registered trademark of Appleton®.

##### Replacement Parts:

- Enclosure gasket VBQ-535
- External handle kit CBHK-100H

See instruction sheet included with device for other available replacement parts.

##### Enclosure:

- Spacious wiring room. Meets the latest NEC wire bending requirements for circuit breaker enclosures
- Ductile Mounting Lugs to adjust to uneven surfaces
- Copper-free construction with 316 grade Stainless Steel External Hardware
- Quick Release Cover Bolts with Triple Leads – only 3-1/2 turns to disengage

- Recessed Flange Notches – Allows easier cover opening with prying instrument without flange damage
- Electrostatically applied polyester/epoxy finish
- Visible "ON" external Breaker Handle has provisions for locking "ON" or "OFF" with up to three Padlocks
- Internal Lock-Off provision for maintenance when no hazardous materials are present

Class III  
NEMA 3, 7 (B, C, D), 9 (F, G)

Listed File No. E91049 and/or E53660

Certified File No. LR14667

**FEATURES-SPECIFICATIONS**

**ACCEPTOR®**

The ACCEPTOR® UGP/UGR Plug and Receptacle system, with its unique, patented design, is interchangeable<sup>①</sup> with other NEMA bladed type explosion-proof and dust ignition proof devices. The series has been tested and classified for use with Crouse-Hinds® Ark-Gard®2 and Appleton® U-Line® plugs and receptacles in hazardous locations. <sup>①</sup> Now available in GFCI versions. See pages R21-R22

**How The Acceptor System Works**

ACCEPTOR receptacles contain an integral switch which must be closed to energize the circuit. The design permits only an approved plug to be energized. To actuate the switch, the plug must be inserted and rotated clockwise approximately 45°. The plug will lock into this position preventing accidental disengagement. To remove, simply push in then turn the plug counterclockwise and pull straight out.

Plugs and receptacles may be used where interchangeable bladed devices are needed in locations made hazardous by the presence of flammable gases or vapors, combustible dusts or easily ignitable fibers and flyings.

Plug can serve to provide power for portable equipment used in both hazardous and non-hazardous areas.

**Applications**

- Petroleum Refineries, Chemical Plants
- Wet/Damp/Corrosive Areas
- Grain Elevators/Feed Mills

<sup>①</sup> Exact models classified for interchangeability are listed in the information sheet provided with the products. Ark-Gard® is a registered trademark of Crouse-Hinds®. U-Line® is a registered trademark of Appleton Electric Company®.

<sup>②</sup> Plugs Rated Group B when used with properly rated & installed receptacles. See next page.

**Features**

- All external hardware is 316 stainless steel to provide low maintenance and long life
- Factory sealed chamber in UGR receptacle contains switch's arcing components
- No additional external seals are required, except in Group B applications

**Quick Wiring Plug**

- Single piece shell for fewer parts
- Transparent wiring entrance holes for easy conductor insertion
- Screws tighten from side with "full sized" screwdriver (slot/Phillips)
- Insulator fits "one way"
- Centered cable grip

- Receptacles are U.L. Listed as raintight. Proper sealing against moisture is assured
- Spring loaded receptacle cover closes when plug is removed to provide protection when not in use
- Copper-free aluminum (less than 4/10 of 1%) alloy resists corrosion
- Electrostatically applied and baked powder epoxy/polyester finish

**PLUG**

ACCEPTOR® plugs conform to NEMA configurations and can be used with standard receptacles in non-hazardous areas to maximize equipment utilization. The system's "turn to engage" feature locks in

plug and can be used to prevent accidental disengagement of critical equipment.

Plugs for use with type S, SO, ST or STO heavy duty cord.

### FEATURES-SPECIFICATIONS

## ACCEPTOR®

### CONNECTORS

The ACCEPTOR® UGRC Connector complements UGP/UGR Plugs and Receptacles, as well as Ground Fault Protected UGFI and UGRGF Models. Used with Acceptor plugs, connectors can extend the reach for hazardous location rated portable equipment such as hand lamps. Connectors eliminate the need for user created corded box mounted receptacles. UGRC Connectors are interchangeable and classified for use with other NEMA bladed type explosion-proof and dust ignition proof plugs, including Crouse-Hinds® Ark-Gard®2 and Appleton® ULine®.

### Features

- Available with the exclusive Breech-Lock Cap (see R5 for more info) – patented notch provides "3rd hand" plug operation (holds lid open while one hand operates plug, and other holds connector).
- Factory Sealed Construction
- Suitable for 14 or 12 gauge SOOW or similar cable
- Copper-free aluminum (less than 4/10 of 1%) alloy resists corrosion
- Electrostatically applied and baked powder epoxy/polyester finish
- Dead Front Construction with integral switch – requires Hazardous Rated NEMA Bladed plug for operation

### Industrial Applications

- Petroleum Refineries
- Chemical/Petrochemical Plants
- Oil Rigs & Platforms
- Wet/Corrosive Environments
- Grain Elevators

### FEATURES-SPECIFICATIONS

## ACCEPTOR®

### PANEL RECEPTACLES

The ACCEPTOR® UGRP Panel Receptacle complements UGP/UGR Plugs and Receptacles, as well as Ground Fault Protected UGFI and UGRGF Models.

Used with Acceptor plugs, panel receptacles provide local power for hazardous location rated portable equipment such as hand lamps. Units are suitable for Class I Div. 1 or Class I Div.2 depending on the enclosure type used<sup>①</sup>.

UGRP Panel Receptacles are interchangeable and classified for use with other NEMA bladed type explosion-proof and dust ignition proof plugs, including Crouse-Hinds® Ark-Gard®2 and Appleton® ULine®.

### Features

- Available with the exclusive **Breach-Lock Cap** (see R5 for more info) – patented notch provides “3rd hand” plug operation (holds lid open while one hand operates plug, and other holds connector).
- Factory Sealed Construction
- Copper-free aluminum (less than 4/10 of 1%) alloy resists corrosion
- Electrostatically applied and baked powder epoxy/polyester finish
- Dead Front Construction with integral switch – requires Hazardous Rated NEMA Bladed plug for operation

Ark-Gard® is a registered trademark of Crouse-Hinds®  
 U-Line® is a registered trademark of Appleton Electric Company®

### Industrial Applications

- Petroleum Refineries
- Chemical/Petrochemical Plants
- Oil Rigs & Platforms
- Wet/Corrosive Environments
- Grain Elevators

- UGRP Receptacles are available “Factory Installed” in the following series:
  - Enclosures**
    - » Series EXB, B7E
  - Distribution Equipment**
    - » Series D2L, B7L Lighting Panelboards
- Contact factory for ordering information

Typical CLI Div. 1 application

Typical CLI Div. 2 application  
 2-3/8” K.O.

FEATURES-SPECIFICATIONS

ACCEPTOR®

SQUARE RECEPTACLE

UGRS Receptacles utilize VERSAMATE® 30A mounting boxes and are designed to provide "ROTATABLE" design enables cover hinge location to be in most convenient position for application. May also be utilized with sheet metal enclosures which contain no arcing devices.

Dimensions

Breach Cap model shown.  
 Flip Cap model dimensions are similar

GFI PROTECTED RECEPTACLE

Utilizes FXS GFI and ACCEPTOR® receptacle to interrupt a circuit, when a ground fault is detected on equipment which may be handled by personnel in hazardous locations.

Features

- Factory Sealed
- Test and Reset push buttons are provided on cover assembly, with optional pilot light available© Unit should be tested monthly
- Includes new GFCI to meet latest UL943 GFCI standards revisions
- Exterior gasket provides NEMA 3 weatherproof protection
- Ground boss for grounding in the splice box
- Color coded wiring and stainless steel cover bolts
- Receptacle used is UGR0-20231. See page R21

## UGFI GROUND FAULT PROTECTOR

### ACCEPTOR®

Adapter Unit

The GFCI protected ACCEPTOR® is the solution to OSHA's requirements for GFCI protection when using portable equipment in hazardous and wet locations. For use with 125V, or 125/250V<sup>②</sup> 15 or 20 amp receptacles without GFCI protection, the **Adapter Unit** provides GFCI and circuit protection to connected apparatus by simply being plugged into an existing receptacle.

The **Hard-Wired Unit** provides the same protection and is used directly as a GFCI protected device. Units are feed-through with one close-up plug.

Typical Application with XHL Series Hand Lamp

UL Listed File No. E91049<sup>②</sup>  
 cSP US Certified File No. LR14667<sup>②</sup>

### FEATURES-SPECIFICATIONS

#### Adapter Unit

- No need to permanently alter existing installations; **Portable Unit** can be temporarily hung using included strap near an existing receptacle wherever protection is required
- Factory Sealed Unit
- Acceptor® plug and cord set included with **Adapter Unit**. Cord is 36"

#### Hard-Wired Unit

- provides GFCI and circuit protection in new installations, or as an upgrade or replacement for non-GFCI receptacles
- Factory Sealed, except Group B

#### Adapter and Hard-Wired Unit

- GFCI device also provides circuit protection, for connected apparatus, against current overload and short circuits
- Acceptor® receptacles and plugs are interchangeable with both Crouse-Hinds® Ark-Gard®2 and Appleton® U-Line® products
- Amber pilot light provides indication that the receptacle is energized.
- Units can be **Padlocked OFF** for maintained safety
- Fully gasketed GFCI compartment prevents moisture from damaging electronic components
- Same high quality materials as the standard ACCEPTOR®

- ① Hard-Wired assemblies in Group B areas require sealing within 6" of enclosure.
- ② 125VAC & 250 VAC devices are CCSAUS certified; 125VAC devices are also UL Listed.
- ③ 2P 250V units are for 2 "hot line" applications and include 2P 5mA GFI breakers. 2P Units are for 120/240V or 120/208Y Grounded Power Supply Systems ONLY. **Do NOT use with Delta supply systems.**

## HAZARDOUS LOCATION – DELAYED ACTION

Listed E23572

Certified LR14667

**Class I, Div. 1 & 2, Groups C, D**  
**Class I, Zones 1 & 2, IIB, IIA**  
**NEMA 7 (C, D)**

### FEATURES-SPECIFICATIONS

#### Applications

KR Series plugs and receptacles are suitable:

- In hazardous locations due to the presence of flammable vapors or gases
- Where a heavy duty plug and receptacle is necessary
- Where a connection is required for portable or movable equipment such as tools, motors, hand lights, etc.
- KP series plugs use solder terminations for sure connection
- KR series receptacles use wire leads for termination

#### Features

- Factory sealed receptacles
- Copper free aluminum
- Straight or angle type receptacles
- Delayed action contacts (See Time Delay Inset)
- Plugs with a wide range of grommet openings
- Extra long grounding pole makes contact first and breaks contact last
- Heavy duty construction to withstand rough and constant usage

#### Selection

Refer to page headings for suitability of specific items. When selecting a Killark device consider the following:

- (A) Installation area (Hazardous or Weather-Resistant)
- (B) Amperage
- (C) Voltage
- (D) Electrical Rating (see below)
- (E) Grounding
- (G) Modifications (see right)
- (H) Mounting arrangement
- (I) Box and hub type
- (J) Cord diameter

<sup>①</sup> CSA approval on 20 Amp only.  
 UL for 20-60 AMP

### Details of Safety Time Delay Feature

The key slot provided in the receptacle engages the key of the plug permitting entrance of the plug in the receptacle in only one position. See steps 1-4.

The contacts are enclosed in long accurate insulating cavities. It is in these cavities that the arcs are extinguished. All contacts are made through round tellurium copper tubing which is extra heavy to withstand arcing as required on the various ampere ratings.

Both plugs and receptacles are equipped with an extra long grounding pole which establishes grounding before the power contacts are engaged. These grounding poles are also the last to break contact. This assures bonding of the portable device to the electrical conduit system.

#### Selection

Modifications are available by adding the following suffix (SU37 or SU38) to the catalog number and can be used to prevent mismatched voltage connections. (Note: It must be added to both the plug and the receptacle so they will mate.)

MODIFICATIONS	
CATALOG NUMBER	DESCRIPTION
SU37	Interior contact assemblies are to be rotated 22-1/2° to the right.
SU38	Interior contact assemblies are to be rotated 22-1/2° to the left.

FITTINGS

## INSTALLATION ACCESSORIES

### STANDARD LOCATION FITTINGS

#### DURALOY® 7 SERIES

Aluminum or Iron conduit bodies. Use with threaded rigid conduit – steel or aluminum.

#### DURALOY® 8 SERIES

Iron conduit bodies. Use with threaded rigid conduit – steel or aluminum.

#### DURALOY® 5 SERIES

Malleable Iron conduit bodies. Use with threaded rigid conduit – steel or aluminum.

#### O SERIES

Aluminum conduit bodies. Use with threaded rigid conduit – steel or aluminum.

#### PCC/ECC/RACC SERIES

Conduit clamps. Use with threaded rigid conduit – steel or aluminum.

### STANDARD LOCATION CONNECTORS

#### K SERIES

Liquidtight connectors. Use with flexible metallic and Type B liquidtight flexible nonmetallic conduit.

#### MC AND CMCA SERIES

Metal clad cable connectors. Use with jacketed metal clad cable types.

### HAZARDOUS LOCATION FITTINGS

#### ENY/EY/EYS/EYD SERIES

Sealing Fittings and materials. Use with threaded rigid conduit – steel or aluminum.

#### GEB/GE/GR SERIES

Aluminum and Iron outlet bodies. Use with threaded rigid conduit – steel or aluminum.

#### X/XALB SERIES

Aluminum conduit bodies. Use with threaded rigid conduit – steel or aluminum.

#### GU/UN SERIES

Aluminum and Iron unions. Use with threaded rigid conduit – steel or aluminum.

#### UNF/UNY SERIES

Expansion Conduit Unions. Use to provide for slight expansion and contraction of conduit runs.

#### PLUG/CUP/AN SERIES

Threaded Insert Plugs and rigid conduit nipples. Use to close up a tapped hole or hub.

#### Z SERIES

Used to secure & seal cords entering enclosures or raceways.

### HAZARDOUS LOCATION FITTINGS

#### R/RE/ADUP SERIES

Reducing bushings and adapters. Use to reduce trade size of a tapped hole or hub.

#### FF/MF/MM/BL/GUFS/Y & EYMF SERIES

Aluminum and Iron elbows. Use to change direction in rigid or IMC conduit systems, or to join conduit at angles.

#### ECFUF/EKJUF/ECF/EKT SERIES

Bronze flexigle couplings with and without female steel unions. Use where movement or vibration requires a flexible connection.

#### EKF SERIES

Stainless steel flexible coupling. Use where movement or vibration requires a flexible connection.

### HAZARDOUS LOCATION CONNECTORS

#### CTCA, MCX & CMCXA SERIES

Metal clad cable connectors. Use with jacketed metal clad cable types in hazardous areas
