

U-bolts
U-Bolt
HYGIENIC

Description

ROCKET RACK® U-Bolts and Beveled Cap Nuts are custom designed and manufactured from 316 stainless for use in installations where corrosion resistance and hygiene are important. The custom design minimizes the risk of exposed threads where dust, dirt, bacteria, and other contaminants could otherwise accumulate and grow. U-Bolts are available in 1/2" - 4" trade sizes, are NSF certified to NSF/ANSI-/3-A-14159-1 and are supplied with two beveled cap nuts with nylon thread locker to provide positive resistance to vibration and loosening.
