Maintenance and Work Lights

Choose Hubbell industrial work lights for maximum user safety. The fluorescent lights are designed with all electrical components located inside a closed chamber for your protection. Lamps stay cool while spreading light over large areas. Work light models can be paired with an adjustable hanging kit or magnetic mounts for positioning flexibility. Portable work lights can be transported and re-mounted. Long cords allow free movement in work space.

Construction Site Lighting

Hubbell's outdoor approved construction site lighting line includes both heavy-duty metal halide lights and light strings for working in rugged environments. The metal halide fixtures feature extremely strong and compact heads with bulbs rated to last 10,000 hours. All frames are powder-coated yellow for safety and are constructed of a durable 1.25 inch, 12 gauge steel tube.

We have light strings for all applications in a variety of models as well as a choice of metal or plastic guards. Light sockets are spaced 10 feet apart and all sockets, plugs, and connectors are molded for added durability. In addition, the highly impact-resistant material makes for easy transportation and storage when not in use. Bulbs can be incandescent, fluorescent or LED. Consider choosing LED lighting for a durable bulb that saves energy, provides instant illumination and are rated to last 50,000 hours.

Explosion-Proof/Confined Space Lighting and Cord Reels

For hazardous locations, bring yourself some peace of mind with Hubbell's explosion proof lighting line and confined space lighting. Any time flammable vapors or dust could be present is a time to use safe lighting, and any time safe lighting is needed is a time to look to Hubbell. We offer both fluorescent and incandescent light bulbs, as well as an automatic shut off switch on hand lamps. Low voltage confined space entry lights can be water resistant, water tight, or explosion proof for a variety of job sites.

For more light where you need it, consider our cord reels with attached hand lamps. With choices such as incandescent, fluorescent, and LED lamps, more light can be brought to more places, small or large. The cord reels, complementary to the end lamps, are constructed of durable, corrosion-resistant steel to last through the toughest jobs and the desired cord length is automatically maintained through a positive-latch mechanism.

More from Hubbell...

Construction sites, outdoor events and other harsh environments need to ensure maximum safety when providing temporary electrical power for equipment and lighting, especially since these applications involve frequent plug-ins and disconnects. Hubbell temporary power distribution systems come in a variety of device types for protecting people against electrical shock in a wide range of applications and job sites.

Watertight Devices

Hubbell offers an extensive line of plugs, connectors, receptacles and accessories rated to withstand harsh and wet environments.

Portable Outlet Boxes

Portable Outlet Boxes provide a safe rugged portable enclosure that can be used in many applications and complies with NEC® 110.12 regarding unused cable openings in metallic boxes.

Spider Boxes

This Heavy Duty UL Type 3R metallic enclosure incorporates the most advanced ground fault module technology for safety as well as watertight straight blade and Safety-Shroud® Twist-Lock® receptacles.

Single Pole

Hubbell's Single Pole connectors are UL Type 4X Rated and made from a specially formulated thermoplastic elastomer (TPE) that resists cracking in cold, hot or oily conditions as well as any other harmful environments.
