ABOUT US

Warshauer Electric Supply, founded in 1954 by Martin Warshauer, is a family-owned business currently run by Martin's son Jim.

With 70 years of experience as an electrical wholesaler, Warshauer has become one of the largest independently owned distributors in the country. As a full-service supply house, Warshauer provides expertise in Switchgear, Engineering Services, Generator Sales/Service/Rentals, Commercial Lighting, Green Energy Solar Solutions/EV Charging/Energy Retrofits/ROI Analysis, High-End Residential Lighting, Lighting Design, and Hunter Douglas shading solutions.

As an industry leader in instruction and education, we offer training for licensed contractors, aspiring electricians, interior designers and architects through various accreditations and certifications by the NJ Board of Electrical Examiners, NJ Department of Labor, ASID-NJ, DE, PA, and City of Philadelphia.

With five convenient distribution locations throughout New Jersey [Parsippany, New Brunswick (UEZ Sales Tax), Tinton Falls (HQ), Lakewood (UEZ Sales Tax) and Woodbury], we offer free delivery to any jobsite and promise exceptional fill rates at very competitive price levels. Our sales philosophy is simple: combine value-added solutions with an unmatched level of expertise.

OUR DEPARTMENTS

- Meter Stacks

SALES

- Bid/Spec
- Design/Build

SERVICE

- 24-HR Emergency Service
- Preventative Maintenance

RENTAL

- Mobile Generators
- Light Towers
- Cables & Accessories

CERTIFIED INSTALLER CLASSES

- Maintenance & Service

Eliminate Lengthy Lead Times with Custom Quick-Ship Power Panels!

Warshauer Electric Supply developed a custom Quick-Ship Panel Program utilizing Siemens components, providing another value-added solution for our customers.

Our initiative allows customers to create panel configurations by simply filling out a form online. The design allows for main breaker to main lug conversion, interior densities rated for up to 1200 amps, and allows for the flexibility to customize branch circuits, while minimizing the complexity of made-to-order panels.

Power Panels are built in-house out of our 40,000 square foot facility in Lakewood and shipped direct.

- UL Listed
- 120/208V & 277/480V Rated
- NEMA 1 & 3R Enclosures
- Circuit Breaker & Switch/Fuse Options Available!

DCC ENERGY MANAGEMENT SYSTEMS

Need an EV charger, but your panel is full?

DCC is a patented product which allows homeowners, condo owners and business owners to install EV chargers without having to upgrade their existing service. DCC Electric Vehicle Energy Management Systems makes EV charging available to virtually anyone!

DCC manufactured by Thermolec, is an EV Energy Management System specifically designed to allow the connection of a charger to the main feeder of the panel without affecting the load calculation. These systems allow the connection of any EV charger to a fully loaded panel by managing the energy available at any given time. DCC EV systems are ideal for the installation of chargers in multi-residential buildings, such as apartments or condominiums. The ideal solution to connect an EV charger to a new branch-circuit of a panel when breaker spaces are available, DCC systems avoid the need for major infrastructure upgrades and allows for a simplified EV charger installation.
